Weâ€™re constantly creating and innovating more effective and affordable ways to learn. Explore our products and services, and discover how you can make learning possible for all students. Higher Education | Pearson - A fluorescence microscope is used for time-lapse imaging of the RBL cell sensor. An argon-ion laser (488 nm) is used for Fluo-4 excitation, and a 515 nm dichroic filter is selected for green fluorescence emission. The glass bottom dish is mounted on the fluorescent microscope in position. A fluorescence picture of RBL cells is taken after the baseline of fluorescence is stabilized. Fluorescence Microscope - an overview | ScienceDirect Topics -
