Sun, 10 Feb 2019 11:30:00 GMT just enough software architecture a pdf - Just Enough Operating System (JeOS, pronounced "juice") is a paradigm for customizing operating systems to fit the needs of a particular application such as for a software appliance. The platform only includes the operating system components required to support a particular application and any other third-party components contained in the appliance, (e.g., the kernel). Sun, 17 Feb 2019 13:09:00 GMT Just enough operating system - Wikipedia - Preamble. How we approach architecture, defines what architecture, in effect, is, at least for our system. That is, no matter what we say architecture is (for), architecture is (an outcome of) what we do. This is a POSIWID (the purpose of a thing is what it does -- Stafford Beer) kind of point, noting that what the thing does, trumps what we may think it is and ought to do.
