edition. Kenneth C.
Louden. ISBN
9781111529413
Prerequisite CSE 120, CSE
310, Course Objective We
will study several issues in
programming languages:
what is a programming
language, how do they
work, and why is one
language better than
another? In answering these

CSE 340: Principles of
Programming Languages
Spring 2012 - Principles are
reinforced with numerous
examples from
contemporary languages.
There are individual
chapters on functional,
logic, and object-oriented
languages, as well as design
principles, parallel
programming, and formal
semantics. Kenneth
